

World Inventions for Children with Disabilities

Day 1 – Sunday

Create a Kite

Orientation Live session 10:30 AM

Is it a bird? It is a plane? No, it's a kite! Learn about the history of kites, who invented it, and how it has been used in our everyday lives. We will guide you on how to make your own kite. The kite will incorporate different textures, scents, colors, and shapes to stimulate your child's senses.

Day 2 – Monday

The Arts and Crafts of Ice pop

Find out how ice pop were invented and learn to make your own delicious flavored ones at home! You and your child can also have fun building different shapes as well as learning a new painting technique using ice pop sticks. 

Day 3 – Tuesday

Make Your Own Soap

We always want our children to practice clean habits. In this activity, learn how to make your own soap of varying textures and wonderful scents. After this, your child will hopefully love bath time and washing their hands regularly!

Live stream session at 8:45 - 9:30 AM

Day 4 – Wednesday

Build Your Own Teddy Bear

Like Winnie-the-Pooh, teddy bears bring us comfort, support, and companionship. Everyone loves teddy bears! Learn about the history of teddy bears and make your own cuddly friend. You'll also learn techniques on how you can make your bear using sensory tools to help your child sleep better at night or feel more comfort when snuggling.
